

Website Design Plan

Google Cloud Arcade Facilitator 2026 Community Hub

1. Project Overview

The goal of this website is to create a central community hub for participants of the Google Cloud Arcade Facilitator 2026 program. The website will help learners understand the program, get started with Google Cloud Arcade, access resources, follow monthly activities, track progress, and connect with the facilitator team for guidance.

This website will be managed by the facilitator team, Neehanth Reddy Maramreddy and Jashwanth Dasari, to support participants through onboarding, reminders, skill badge completion, monthly milestones, community engagement, and learning support.

The website should be simple, professional, beginner-friendly, and easy to maintain.

2. Website Purpose

The website should serve four main purposes:

1. **Onboarding**

Help new participants understand how to join, set up their Google Cloud Skills Boost account, access Arcade activities, and join the community channels.

2. **Guidance**

Provide monthly roadmaps, learning paths, resource links, FAQs, and step-by-step instructions.

3. **Engagement**

Encourage consistent participation through updates, events, leaderboard highlights, badge shoutouts, and community milestones.

4. **Support**

Give participants a clear way to ask questions, report issues, contact facilitators, and get help when stuck.

3. Target Audience

The website is designed for:

- Students interested in Google Cloud and AI learning
- Beginners who are new to cloud computing
- Participants enrolled in the Google Cloud Arcade Facilitator 2026 program
- Community members looking for monthly guidance and reminders
- Learners completing Arcade games, trivia, skill badges, and milestones

The content should avoid unnecessary technical complexity and should explain steps clearly for beginners.

4. Website Tone and Style

The tone should be:

- Professional but friendly
- Encouraging and student-friendly
- Clear and easy to understand
- Community-focused
- Authentic and not overhyped
- Aligned with Google Cloud learning and skill development

Avoid making unsupported claims such as guaranteed rewards, guaranteed certification, or official Google ownership unless stated by official sources.

5. Branding and Disclaimer

The website should clearly present itself as a facilitator-led community hub, not an official Google-owned website.

Suggested disclaimer:

This is a facilitator-led community website created to support learners participating in the Google Cloud Arcade Facilitator 2026 program. For official rules, dates, eligibility, rewards, and program updates, participants should always refer to official Google Cloud and Google Skills Arcade sources.

Branding recommendations:

- Use a clean cloud-learning theme.
 - Avoid using Google logos as the main website identity unless officially permitted.
 - Avoid naming the website in a way that suggests it is an official Google website.
 - Use phrases like “facilitator-led community,” “community hub,” and “learner support website.”
-

6. Recommended Website Name Options

Possible names:

- Arcade Cloud Community Hub
- Cloud Arcade Learners Hub
- Google Cloud Arcade 2026 Community Hub
- Arcade Facilitator Learning Hub
- Cloud Skills Arcade Community

Recommended name:

Google Cloud Arcade Facilitator 2026 Community Hub

Safe subtitle:

A facilitator-led learning community for Google Cloud Arcade participants

7. Sitemap

The website should include the following main pages:

1. Home
2. About
3. Get Started
4. Monthly Roadmap
5. Resources
6. Events
7. Leaderboard
8. FAQs
9. Contact

For the first version, the website can launch with:

1. Home
2. Get Started
3. Monthly Roadmap
4. Resources
5. FAQs
6. Contact

The Events and Leaderboard pages can be added after the community becomes active.

8. Page-by-Page Design Plan

8.1 Home Page

Purpose

Introduce the community, explain the value of the website, and guide participants to the most important actions.

Sections to Include

Hero Section

Title:

Google Cloud Arcade Facilitator 2026 Community Hub

Subtitle:

Learn Google Cloud through hands-on Arcade games, skill badges, monthly challenges, and community support.

Call-to-action buttons:

- Join WhatsApp Community
- Join Telegram Community
- Start Google Cloud Arcade
- View Monthly Roadmap

Quick Overview

Short explanation of what the website offers:

- Beginner onboarding
- Monthly Arcade roadmap
- Skill badge guidance
- Community updates
- Doubt support
- Resource sharing
- Progress reminders

Why Join This Community?

Include 3–4 simple cards:

- Learn Google Cloud step by step
- Stay updated with monthly activities
- Get support from facilitators and peers
- Track your progress and milestones

Important Links

Add quick access cards:

- Google Cloud Skills Boost
- Arcade Program Page
- Monthly Roadmap
- Community Guidelines
- Contact Facilitators

8.2 About Page

Purpose

Explain the program, the community, and the facilitator team.

Sections to Include

About the Program

Briefly explain that the Google Cloud Arcade Facilitator Program helps learners explore Google Cloud and AI technologies through hands-on games, skill badges, and monthly activities.

About This Community

Suggested content:

This community was created to help participants stay consistent, understand monthly activities, complete skill badges, and build practical cloud skills with peer and facilitator support.

Meet the Facilitators

Include profile cards:

Neehanth Reddy Maramreddy

Google Arcade Facilitator 2026

Focus areas: onboarding, cloud/AI learning guidance, progress support, community updates

Jashwanth Dasari

Google Arcade Facilitator 2026

Focus areas: participant support, reminders, resource sharing, milestone guidance

Each profile can include:

- Name
- Role
- Short bio
- LinkedIn link
- Contact option, if comfortable

8.3 Get Started Page

Purpose

Give beginners a clear step-by-step process to join and begin participating.

Sections to Include

Step-by-Step Guide

1. Create or sign in to your Google Cloud Skills Boost account.
2. Visit the Google Cloud Arcade page.
3. Subscribe or join the available Arcade activities.
4. Make your Skills Boost profile public.

5. Join the WhatsApp or Telegram community.
6. Follow the monthly roadmap.
7. Complete games, trivia, and skill badges.
8. Share your progress when requested.
9. Ask for help when stuck.

Beginner Checklist

Add a checklist format:

- I created my Skills Boost account.
- I joined the Arcade program.
- I made my profile public.
- I joined the community group.
- I checked the monthly roadmap.
- I completed my first lab or game.

How to Ask for Help

Include this format:

When asking for help, please share:

- Lab or game name
 - Step where you are stuck
 - Screenshot of the error
 - What you already tried
 - Skills Boost profile link, if needed
-

8.4 Monthly Roadmap Page

Purpose

Help participants stay organized with monthly goals, deadlines, and recommended activities.

Sections to Include

Monthly Overview

Example:

July 2026 Roadmap

- Week 1: Onboarding and account setup
- Week 2: Beginner Arcade games
- Week 3: Skill badge completion
- Week 4: Progress check and doubt-clearing session

Weekly Activity Cards

Each week can include:

- Goal
- Recommended tasks
- Useful links
- Deadline
- Difficulty level
- Reminder message

Monthly Milestones

Include:

- Games to complete
- Skill badges to complete
- Trivia/challenges
- Progress submission deadline
- Community event dates

Progress Reminder

Add a small reminder:

Participants are encouraged to check their progress weekly and follow official program updates for points, milestones, and reward-related information.

8.5 Resources Page

Purpose

Collect all useful learning links, guides, and troubleshooting resources in one place.

Resource Categories

Official Links

- Google Cloud Skills Boost
- Google Cloud Arcade
- Google Cloud documentation
- Google Cloud Learning Community

Beginner Learning Resources

- Cloud basics
- Google Cloud fundamentals
- BigQuery basics
- Kubernetes basics
- Firebase basics

- AI/ML on Google Cloud
- Data analytics on Google Cloud

Skill Badge Help

- How to start a skill badge
- How to complete labs
- How to troubleshoot common lab issues
- How to make your profile public
- How to share badges on LinkedIn

Community Resources

- WhatsApp community link
 - Telegram community link
 - Monthly roadmap
 - FAQs
 - Contact facilitators
-

8.6 Events Page

Purpose

Display upcoming community sessions and learning activities.

Event Types

- Orientation session
- Weekly doubt-clearing session
- Skill badge sprint
- Arcade progress check
- Cloud basics workshop
- AI/ML learning session
- LinkedIn badge sharing session
- Monthly milestone celebration

Event Card Fields

Each event should show:

- Event title
 - Date and time
 - Description
 - Facilitator name
 - Meeting link
 - Registration link, if needed
 - Recording link, if available
-

8.7 Leaderboard Page

Purpose

Encourage participation and celebrate learner progress.

Sections to Include

Weekly Highlights

- Most consistent learners
- Top badge achievers
- Active community helpers
- First-time badge completers

Monthly Recognition

- Milestone achievers
- Skill badge completions
- Community contributors
- Learner spotlight

Important Note

Leaderboard should be motivational, not overly competitive.

Suggested wording:

This leaderboard is designed to celebrate learning consistency, participation, and community contribution. It is not an official ranking or reward confirmation page.

8.8 FAQ Page

Purpose

Answer common participant questions and reduce repeated messages in the community group.

Suggested FAQs

1. What is Google Cloud Arcade?
2. Who can join this community?
3. Is prior cloud experience required?
4. How do I create a Google Cloud Skills Boost account?
5. How do I make my profile public?
6. What are skill badges?
7. How do I complete monthly Arcade activities?
8. How do I track my progress?
9. What should I do if a lab is not working?
10. Are rewards guaranteed?

11. Where can I check official rules and deadlines?
 12. How do I contact the facilitators?
 13. Can beginners participate?
 14. Can I share my badge on LinkedIn?
 15. How often should I check the roadmap?
-

8.9 Contact Page

Purpose

Give participants a clear way to connect with the facilitator team.

Sections to Include

Community Links

- WhatsApp Community
- Telegram Community

Contact Form

Fields:

- Name
- Email
- Skills Boost profile link
- Issue type
- Message
- Screenshot upload, optional

Support Categories

- Onboarding help
- Lab issue
- Skill badge question
- Progress tracking
- Community issue
- Event question

Facilitator Contact

Include LinkedIn or email if the team is comfortable sharing.

9. User Experience Design

The website should be:

- Mobile-friendly

- Fast-loading
- Easy to navigate
- Simple and clean
- Beginner-friendly
- Accessible on low-bandwidth connections

Most participants will likely open the website from WhatsApp, Telegram, or mobile browsers, so the mobile version should be prioritized.

Navigation Design

Use a simple top navigation:

Home | Get Started | Roadmap | Resources | FAQs | Contact

On mobile, use a hamburger menu.

Design Style

Recommended visual style:

- Clean white or light background
- Cloud-inspired blue accents
- Rounded cards
- Simple icons
- Clear headings
- Minimal animations
- Easy-to-read fonts

Suggested design theme:

Modern learning community + cloud technology

10. Content Guidelines

All website content should follow these rules:

- Keep language simple.
 - Use short paragraphs.
 - Use step-by-step instructions.
 - Avoid overpromising rewards.
 - Always redirect users to official pages for official rules.
 - Avoid sharing unofficial deadlines unless verified.
 - Keep monthly content updated.
 - Make beginner instructions clear.
 - Use motivational but realistic language.
-

11. Technical Plan

Recommended Tech Stack for MVP

Option 1: Simple and fast

- Frontend: Next.js or React
- Styling: Tailwind CSS
- Hosting: Vercel or Netlify
- Forms: Google Forms or Formspree
- Data: Google Sheets for progress tracking

Option 2: No-code / low-code

- Google Sites, Notion, Framer, Webflow, or Carrd
- Google Forms for registration
- Google Sheets for tracker
- Embed links and updates manually

Recommended for first launch:

Next.js + Tailwind CSS + Vercel

This gives the team flexibility while keeping deployment simple.

12. Suggested MVP Features

The first version should include:

- Home page
- About section
- Get Started guide
- Monthly roadmap
- Resource links
- FAQ page
- Contact form
- WhatsApp and Telegram community buttons
- Basic disclaimer
- Mobile-responsive design

Avoid adding complex login, dashboards, or automated leaderboard features in the first version.

13. Future Features

After the website is launched and the community becomes active, the team can add:

- Participant login
- Badge progress tracker

- Monthly leaderboard
 - Event RSVP system
 - Automated announcements
 - AI FAQ chatbot
 - Google Sheets integration
 - Community dashboard
 - Badge shoutout generator
 - Resource search
 - Blog/news section
 - Admin panel for facilitators
-

14. Maintenance Plan

The website should be updated regularly.

Weekly Updates

- Add reminders
- Update events
- Add common questions
- Highlight active learners
- Fix broken links

Monthly Updates

- Update roadmap
- Add new Arcade activities
- Refresh resources
- Add milestone reminders
- Publish monthly announcement

As Needed

- Update official links
 - Add troubleshooting guides
 - Update FAQs
 - Remove outdated information
 - Add new community guidelines
-

15. Roles and Responsibilities

Neehanth Reddy Maramreddy

Suggested responsibilities:

- Website content planning
- Monthly roadmap updates
- Onboarding guide

- FAQ management
- Participant support documentation
- LinkedIn/community announcement drafts

Jashwanth Dasari

Suggested responsibilities:

- Community updates
- WhatsApp/Telegram coordination
- Event planning
- Participant reminders
- Resource collection
- Progress tracking support

Both facilitators can review website content before publishing.

16. Success Metrics

The website's success can be measured using:

- Number of community members joining from the website
 - Number of participants completing onboarding
 - Monthly roadmap page visits
 - FAQ page usage
 - Event participation
 - Number of support questions reduced in groups
 - Number of participants sharing progress
 - Skill badge completion engagement
 - Community feedback
-

17. Launch Plan

Phase 1: Planning

- Finalize website name
- Finalize sitemap
- Collect official links
- Prepare page content
- Choose tech stack

Phase 2: Design

- Create wireframes
- Choose color palette
- Design homepage
- Design roadmap and resources pages
- Review mobile layout

Phase 3: Development

- Build main pages
- Add navigation
- Add community buttons
- Add contact form
- Add disclaimer
- Test all links

Phase 4: Review

- Review content accuracy
- Check mobile responsiveness
- Test forms
- Test loading speed
- Verify official links

Phase 5: Launch

- Publish website
 - Share link in WhatsApp and Telegram
 - Announce on LinkedIn
 - Collect participant feedback
 - Update based on feedback
-

18. Final Recommendation

The first version of the website should focus on clarity, usefulness, and easy maintenance. Instead of building too many advanced features at the beginning, the team should launch a simple community hub with onboarding, roadmap, resources, FAQs, and contact support.

The website should help participants answer three main questions:

1. How do I start?
2. What should I complete this month?
3. Where do I get help?

If the website answers these clearly, it will be valuable for the Google Cloud Arcade Facilitator 2026 community.
